1. INTRODUCTION

The Center for the Study of Organizations and Decisions in Economics (CODE) is a research center at the Universitat Autònoma de Barcelona, created in 1995 to promote high quality research in the theory of economic decisions and organizations. Since the beginning of its activities, CODE's main goal is to provide an environment allowing excellence in research as measured by the international standards of scientific quality.

CODE's permanent members belong to the Department of Economics at the UAB, which has pioneered in Economics Research for the last twenty years. The Department is still the natural meeting point for the activities, like undergraduate and doctoral education, for which diversity of interests and abilities are most important.

The activity report strives to be a regular publication that our colleagues look forward to be available. The present edition cover the activities performed during 1998.

In its fourth year of activities, CODE has hosted 19 visitors from all over the world for stays ranging from one month to one year. Research activities can be grouped in five areas: Financial Economics/Macroeconomics, Industrial Organization, Mathematical Economics, Public Economics and Social Choice/Game Theory. All this research is developed through 15 research project financed by the Spanish Ministry of Education, the Catalan Government (Generalitat de Catalunya) and the European Union. It has materialized in 21 papers published in the leading economic journals and the participation of CODE members in the main academic meetings, both as organizers and as participants.

All in all we hope this report reflects the commitment of CODE to build an increasingly consistent research center that can be taken as a reference point of top quality research within in Europe and beyond.

3. AREAS OF RESEARCH

Financial Economics-Macroeconomics

- 1.Security Design with Several Projects and Insider Trading (Jordi Caballé)
- 2.The Sources of Volatility in Financial Markets with Insider Trading (Jordi Caballé)

Industrial Organization

- 1.Iceberg Transport Costs (Xavier Martinez-Giralt)
- 2.The impact of the "Chunnel" on the Location of Production Activities (Xavier Martinez-Giralt)
- 3.On the Effects of Antidumping Legislation (Xavier Martinez-Giralt)
- 4.Telecommunication Technologies and Location of Activities (Xavier Martinez-Giralt)
- 5.Simple Mechanisms to Implement Stable Situations in Labor Markets (David Pérez-Castrillo)

Mathematical Economics

1.Convexity in Cooperative Game Theory (Isabel Fradera and Juan Enrique Martínez-Legaz)

Public Economics

- 1.Optimal Inspection Policies (Inés Macho-Stadler and David Pérez-Castrillo)
- 2.Fiscal Amnesties (Pau Olivella)
- 3.Public and Private Provision of Health Care (Xavier Martínez-Giralt)
- 4.Waiting Lists in the Health Care System (Pau Olivella)
- 5.Provision of Incentives in Health Care Systems (Inés Macho-Stadler)

Social Choice Theory-Game Theory

- 1.Non-manipulable Voting Mechanisms and Feasibility Restrictions (Salvador Barberà and Jordi Massó)
- 2.Cooperative Game Theory and Compromise Values (Jordi Massó)
- 3.Axiomatic Analysis of Iterative Negotiations (Clara Ponsatí)
- 4.Non-cooperative Negotiation Games with Outside Options (Clara Ponsatí)
5. Properties of the Set of Stable many-to-one Matchings (Jordi Massó)

4. RESEARCH PROJECTS

A brief description is given of the research projects in which the members of CODE are involved. These projects are financed by the Ministry of Education and Science through the Inter-Ministerial Commission of Science and Technology, by the Government of Catalonia and by the European Community.

Title:Cooperation and Competition: Studies on Strategic Behaviour and Institutional Design. DGICYT PB96-1192 (3 years)

Team coordinator: Salvador Barberà

Description: This project study games and institutions from a strategic viewpoint. We try to overcome the rigid separation between what is cooperative and what is non-cooperative and mix both types of considerations. The implentability cooperative objectives and the social consequences of non-cooperative processes are examples of questions we ask both for abstract games and for specific institutional contexts. The latter include large markets, voting situations, firms and different governmental policies.

Description: Grants for foreign researchers in Spain.

Title: Mix Duopoly in Health Care Markets HP 1997-0062. (1 year)

Team coordinator: Xavier Martínez-Giralt

Description: Bilateral Research Project (Spain/Portugal)

Title: Programa Hispano-Norteamericano de Cooperación Científica y Tecnológica (1year)

Team coordinator: Salvador Barberà

Description: Bilateral Research Project (Spain/USA)

Title: Topics in Public Economics: Economics of Innovation and Health Economics PB97-0181 (2 years)

Team coordinator: Inés Macho-Stadler

Description: This project consists in applying the microeconomic analysis to two aspects of Public Economics. The first refers to the Economics of Technological Change, and the second refers to Health Economics. The aim is to obtain normative conclusions that are useful in the design of desirable technological and health policy. First, we attempt to study the optimal technological policy with respect to joint research projects and mergers, while at the same time analyzing the appropriate combination of institutional and administrative mechanisms in a technological policy. Second, we attempt to study the way in which the private and public provision of health services may coexist. As a particular case, we will analyze the MUFACE

system in Spain. We also want to engage in the design of the best organization of each the health systems, as well as the demand-cost-sharing schemes and the incentive mechanisms directed to the service providers.

Title: Modelos dinámicos: aplicaciones a la macroeconomía y al crecimiento económico PB96-1160-C02-02 (three years)

Team coordinator: Jordi Caballé

Description: In this project we intend to apply some techniques borrowed from dynamic economics to macroeconomic theory. We emphasize the applications to the areas which are more active in the present, like growth theory and exogenous and endogenous business cycles.

9. ORGANIZATION OF CONFERENCES

"BARCELONA-JOCS"

Academic year 1997/98
Organizer: Jordi Massó

Academic year 1998/99

Organizer: Salvador Barberà

BARCELONA-JOCS is a series of seminars attended by researchers from the following six academic institutions located in Barcelona metropolitan area and Girona: Institut d'Anàlisi Econòmica (CSIC), Universitat de Barcelona, Universitat Autònoma de Barcelona, Universitat Politècnica de Catalunya, Universitat Pompeu Fabra and Universitat de Girona. It started two years ago and it consist in a monthly meeting (the last Monday of every month). Each session has two speakers, an insider from one of Barcelona institutions and an outsider from anywhere else. The seminars are hold at the Institut d'Estudis Catalans, downtown Barcelona.
